## Customer Documentation Overview

2026-08-30

**Atlas** is the storage control plane — Ceph/RBD volumes, protection, DataBridge migrations, and day-2 ops from Storage Center.

| You want to...               | Open                                |
|------------------------------|-------------------------------------|
| Install and open the console | <a href="#">Getting Started</a>     |
| Learn the shell              | <a href="#">Using the Dashboard</a> |
| Follow a page, step by step  | <a href="#">Page-by-page guides</a> |
| Look up any screen by route  | <a href="#">Complete page index</a> |
| Deploy, auth, ports          | <a href="#">Admin basics</a>        |
| Multi-page jobs              | <a href="#">Common workflows</a>    |

## Printable PDFs

```
set -a, source scripts/customer-docs/product.env; set +a
code scripts/customer-docs/build-customer-pdfs.mis
```

Output lands in [pdf/](#).

## Product at a glance

---

```
Storage Center — http://<host>:5110/ (NodePort often :30511 / HTTPS :30543)
```

```
Health → GET /health
```

```
Optional gRPC → :5111
```

```
CLI → atlasctl ...
```

Never publish lab IPs in customer docs — use `<host>` .
